

# FF40/FF20

DUPLEX water filter with activated carbon cartridge,  
SIMPLEX water filter, or activated carbon filter

## Product specification sheet

**FF40**

**FF20**

### Application

The DUPLEX water filter combines two different filter cartridges in one housing. Activated carbon removes dissolved organic material and chlorine. The polypropylene cartridge holds back undissolved matter.

In applications where only one filter type is needed a SIMPLEX filter with the selected filter cartridge can be used.

The filters ensure a continuous supply of filtered water. The fine filter prevents the ingress of particulates, for example rust particles, strands of hemp and grains of sand.

The filters can be applied to rain water treatment within the range of their specifications.

### Special Features

- Large filter surface
- Filter insert fully interchangeable
- Very simple operation
- Reliable and tested

### Range of Application

Medium                      Water

### Technical Data

Installation position	Horizontal with filter bowl downwards
Operating pressure	Maximum 6.0 bar
Operating temperature	Maximum 45 °C
Connection size	3/4" female, 1" male with 3/4"-1" adapter

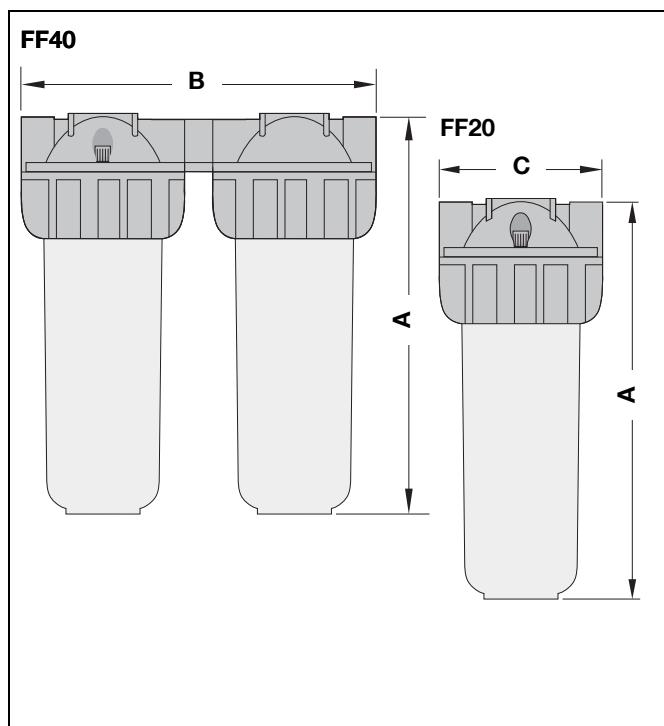

### Construction

The filters comprise:

- Duplex or Simplex housing, wall bracket, wall bracket screws
- Clear filter bowl
- Fine filter 25 µm,
- Activated Carbon insert
- 3/4" female thread
- 3/4"-1" male adapter
- Ring wrench for filter bowl

### Materials

- Head and ring nut: reinforced polypropylene
- Polypropylene fine filter
- Clear synthetic material filter bowl
- EPDM O-rings

### Method of Operation

Water flows through the filter mesh from outside to inside and this traps dirt particles on the outer face of the filter. For reasons of hygiene, the filter insert must be replaced at no longer than six monthly intervals.

Activated Carbon cartridge filters out fine particles, eliminates of unpleasant odours and flavours caused by chlorine or other organic substances, removes of pesticides, insecticides, chlorinate solvents.

Average life-span of activated carbon cartridges: about 6 months.

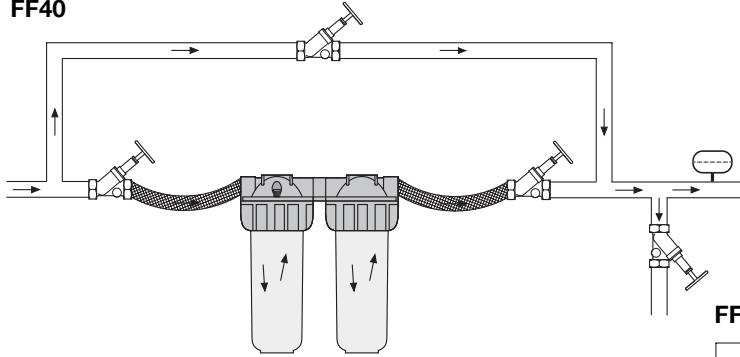

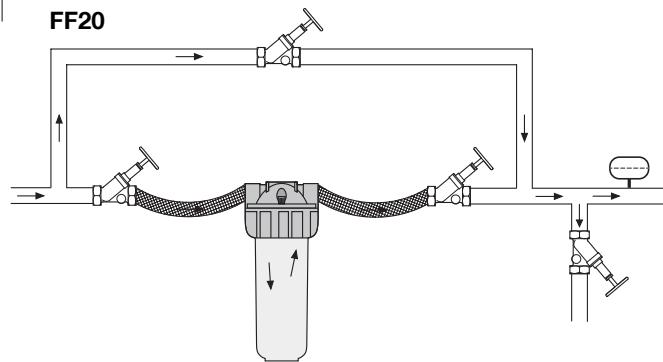

### Options

FF40 Duplex water filter: mesh size 25µm combined with activated carbon

FF20-MF Simplex water filter: mesh size 25µm

FF20-AC Simplex activated carbon

	Duplex FF40	Simplex FF20-MF Simplex FF20-AC
Connection size	3/4" female, 1" male with 3/4"-1" adapter	
Approximate weight ca. kg	0.7	1.0
Dimensions mm		
A	320	320
B	275	-
C	-	133
Flow value at $\Delta p = 0.2$ bar m <sup>3</sup> /h	0.4	2.5 FF20-MF 0.4 FF20-AC
k <sub>vs</sub> -value	1.4	6.0 FF20-MF 1.4 FF20-AC

**Installation Example****FF40****FF20****Installation Guidelines**

- Install in horizontal pipework with filter bowl downwards
  - This position ensures optimum filter efficiency
- Install shutoff valves before and after the filter
- Ensure good access
  - Degree of contamination can be seen with clear filter bowl
  - Simplifies maintenance and inspection
- The installation location should be protected against frost
- Do not install in places where there is strong sunlight

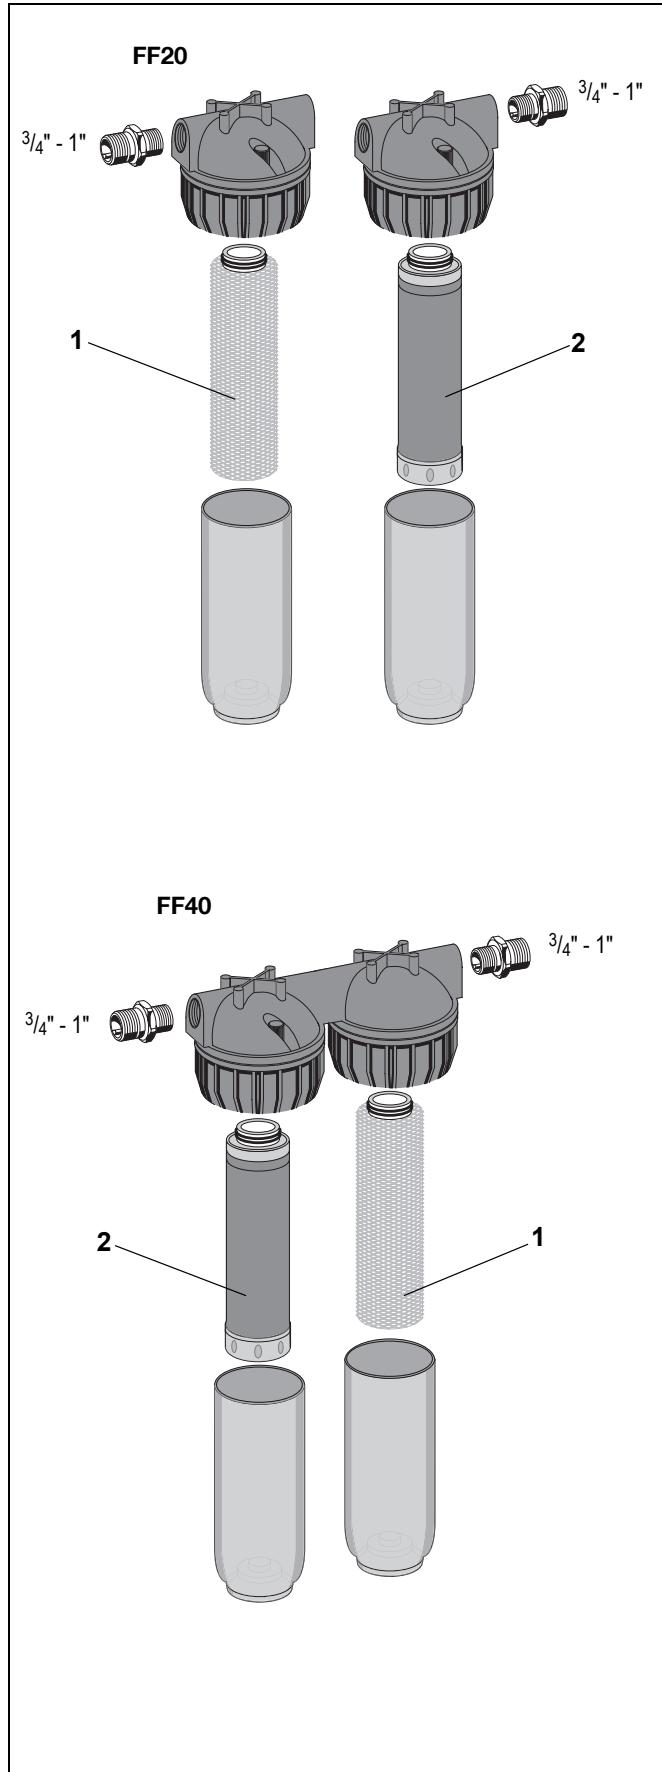

**Typical Applications**

Fine filters of this type are suitable for supplies to buildings of all types. They can also be used for commercial and industrial applications within the limits of their specifications.

Fine filters with active carbon cartridge can be applied to rain water treatment.

Fine filters of this type are installed:

- Where no pressure reducing valve is required (maximum 6.0 bar static pressure)
- Where a pressure reducing valve is already fitted but cannot be retrofitted with a filter

#### FF40/FF20 Fine Filters (From June 2008 onwards)

- 1** Replacement filter cartridge Cartridge Height FF20-DMF  
25µm 10"
- 2** Replacement active carbon Cartridge Height FF20-GAC  
cartridge 10"
